## Workshop on Future of DC Distribution Systems for Stationary and Mobile Applications

Day 1: Wednesday October 2<sup>nd</sup> Conference Room: NREL ASPEN A&B

Day 1:	Wednesday October 2" Conference Room: NREL ASPEN A&B
Start	Item
8:15	Breakfast – Participants check in at NREL East Security Entrance for Shuttle to ASPEN A&B Conference Rooms at NREL
	Welcome – Context for the Workshop and Agenda Review.
0.00	NREL and Eaton hosts
8:30	Welcome – Morning Session – Current State-of-the-Art
	Introduction – TBD
	Panel 1 - Current State-of-the-Art of Stationary DC Distribution
	Moderator: TBD
	The panel will focus on the DC distribution related to EV charging with DC/DC chargers, DC
9:00	microgrids, DC datacenters, PV and Energy storage farms. The goal is to understand what
	the current practices are and what the new trends are. Challenges faced by the designers
	and installers will be useful. If there are pilot projects in this area it will be great provide some details.
10:00	Coffee Break
10.00	
	Panel 2 - Current State-of-the-Art of Mobile DC Distribution  • Moderator: TBD
	The panel will focus on the DC distribution related to light, medium, and heavy-duty vehicles,
10:15	aerospace applications, ship-board power systems and any others related to mobility. The
	goal is to understand what the current practices are and what the new trends are in DC
	distribution. Challenges faced by the designers and OEMs will be useful. If there are pilot
	projects in this area it will be great provide some details.
11:15	Panel 1 & 2: Interactive Conversation
	All Participants
12:00	Lunch break – TBD  Welcome – Afternoon Session -Technical Challenges
1:00	Introduction—TBD
	Panel 3 - Technical Challenges in DC Distribution Architectures - Stationary and
	Mobile
	Moderator: TBD
1:15	There are common features in stationary and mobile DC architectures but there are
	significant differences as well. The goal here is to identify the challenges faced with different
	architectures being adapted or proposed. The panel presenters will provide their insights into the challenges they face and the trends in the respective industry to address them. The end
	goal is for the participants to go away and build the right products.
0.00	Panel 3 - Interactive Conversation
2.30	All Participants
3:15	Break
	Panel 4 - Technical Challenges in DC Solid State and Hybrid Breakers – Stationary and
	Mobile
	Moderator: TBD
	Solid state and hybrid DC switches (breakers and contactors) are being proposed for various
3.30	applications. What are the challenges for low-current-low-voltage and high-current-higher-voltage switches? What are broadly recognized as current and voltage limits for the switches.
0.00	Is there a need for standards that can help product development? The goal here is to identify
	the use cases for these devices in both stationary and mobile applications and the panel
	presenters will provide their insights into the challenges they face and the trends in the
	respective industry to address them. The end goal is for the participants to understand the
	gaps and what could be available in near time for pilot projects.
4.30	Panel 3: Interactive Conversations
	All Participants

Day 2: Thursday October 3<sup>rd</sup> Conference Room TBD: 14142 Denver West

Start   Item	
8:45 Meet at NREL's FLATIRONS Campus if you are on your own  9:00 FLATIRONS Campus tour starts  10:00 End of tour  10:30 Eaton Colleagues Only: Meet at 14142 Denver West Parkway Welcome - Brian Carlson and (Armen/Mark V)  Intro to "Business Brainstorming" History of Innovation Efforts - Mark Roser, Brian, and Calvin • Prior approaches to innovation workshops • Shots on Goal approach History of PCS Business - Brian Carlson • How the scope of products was decided • The breadth of their product offerings History of Mobility Business - Aerospace (Armen), Mobility (Mihai) • How the scope of products was decided • The breadth of their product offerings Goals for today - Mark Roser • Identifying possible customer targets • Aligning with possible Eaton technology solutions • Delivering a prioritized list of new businesses in the DC distribution  Developing our list of priorities / Pugh Matrix • Our evaluation Criteria • "How will we make our prioritization decisions?" • Group agreement on weighting factors for the matrix  Introduce existing and brainstorm possible additional Eaton solution areas • List of possible solutions	
9:00 FLATIRONS Campus tour starts  10:00 End of tour  10:30 Eaton Colleagues Only: Meet at 14142 Denver West Parkway Welcome - Brian Carlson and (Armen/Mark V) Intro to "Business Brainstorming" History of Innovation Efforts - Mark Roser, Brian, and Calvin  • Prior approaches to innovation workshops  • Shots on Goal approach History of PCS Business – Brian Carlson  • How the scope of products was decided  • The breadth of their product offerings History of Mobility Business – Aerospace (Armen), Mobility (Mihai)  • How the scope of products was decided  • The breadth of their product offerings Goals for today – Mark Roser  • Identifying possible customer targets • Aligning with possible Eaton technology solutions • Delivering a prioritized list of new businesses in the DC distribution  Developing our list of priorities / Pugh Matrix  • Our evaluation Criteria  • "How will we make our prioritization decisions?" • Group agreement on weighting factors for the matrix Introduce existing and brainstorm possible additional Eaton solution areas • List of possible solutions

Intro to "Business Brainstorming"   History of Innovation Efforts - Mark Roser, Brian, and Calvin	
History of Innovation Efforts - Mark Roser, Brian, and Calvin  Prior approaches to innovation workshops Shots on Goal approach History of PCS Business – Brian Carlson How the scope of products was decided The breadth of their product offerings History of Mobility Business – Aerospace (Armen), Mobility (Mihai) How the scope of products was decided The breadth of their product offerings Goals for today – Mark Roser Identifying possible customer targets Aligning with possible Eaton technology solutions Delivering a prioritized list of new businesses in the DC distribution  Developing our list of priorities / Pugh Matrix Our evaluation Criteria "How will we make our prioritization decisions?" Group agreement on weighting factors for the matrix  Introduce existing and brainstorm possible additional Eaton solution areas List of possible solutions	
Our evaluation Criteria     "How will we make our prioritization decisions?"     Group agreement on weighting factors for the matrix  Introduce existing and brainstorm possible additional Eaton solution areas     List of possible solutions	
Introduce existing and brainstorm possible additional Eaton solution areas  • List of possible solutions	
<ul> <li>Open for additional topics and focus areas</li> <li>Divide into small teams:</li> <li>Target of 2 groups</li> </ul>	
12.:00 Lunch break	
1:00 Individual group warm-up:  • Introductions between group members  • Members share their knowledge of what Eaton is doing in the area	
Small group-1 diverge on unmet market needs: <ul> <li>"Different hats" – members will take turns sharing how the opportunity appears different applications</li> <li>Capture – unmet needs, barriers, what will people pay a premium for Converge on highest alignment and highest value market needs</li> <li>Convergence by discussion and / or voting for what are the top needs that align "Why Eaton"</li> </ul>	
2:00 Market Needs Report-Out:  • 4-minute sharing by each group to the whole room	
1:15 Small group-2 competitive analysis  • Members share their knowledge of what competitors are doing	

	- Duilding the 'norfeet competitor' everging
	Building the 'perfect competitor' exercise
	'Capture the flag' exercise
	Converge on highest competitive priorities
	Top opportunities for Eaton
	Top threats to Eaton
2:20	Competitive Analysis Report-Out:
	<ul> <li>4-minute sharing by each group to the whole room</li> </ul>
	Identify gaps and overlaps between groups
2:45	<ul> <li>Groups will discuss where there is overlap or unintended gaps</li> </ul>
	Groups adjust their focus / boundaries to address any gaps / overlaps
3:00	Coffee break
	Small group-1 & 2 converge on their key value-proposition elements
	Discuss how the convergent lists of Market Needs, Opportunities, and Threats can be
3:15	put into a larger framework – is there a way to organize some of these into a value-
	added offering?
	Prioritize the Market Needs, Opportunities and Threats
	Small group-1 & 2 map the opportunity space for Eaton in their areas
	Describe the range of opportunities in the space
	Draw a boundary of what is in and out of scope for the areas
4:00	List of possible experiments to help determine viability of the business
	List of pre-requisites for success in the area
	List of collaborators for success in the area
4:45	Report-Out
	4-minute sharing by each group to the whole room
	4-minutes for Pugh scoring, dialog and feedback
	Overall group mapping:
5:15	All groups are placed on a map to identify which opportunities will serve as "beach-head
	opportunities", "scale and growth opportunities", "evergreen opportunities"
6:00	Next Steps
	Sharing and next steps
6:30	Adjourn

Day3: Friday October 4<sup>th</sup> Conference Room TBD: 14142 Denver West

Start	Item
8:15	Breakfast – Participants check in at 14142 Denver West Pkwy Building
8:45	Report-Out  • 4-minute sharing by each group to the whole room 4-minutes for Pugh scoring, dialog and feedback
9:15	Overall group mapping: All groups are placed on a map to identify which opportunities will serve as "beach-head opportunities", "scale and growth opportunities", "evergreen opportunities"
10:00	Next Steps Sharing and next steps
10:30	Travel to NREL for visit to ERL lab demos
12:30	Lunch at NREL
1:30	Continue lab tour at NREL
3:00	Adjourn
